

SR-20

10 January 1949

MEMORANDUM FOR B/WE

FROM G/SI

SUBJECT: Summary of suggestions made in conversation with Mr. [REDACTED]
on certain Sections of SR-20 (Germany)

25X1A

1. Summary: rewrite in terms of any changes in German situation not noted in the attached version and with a view of bringing in all important points covered in the body of the report.

2. Section IV (Military): Add section on remaining exploitable military potential. Presumably economic aspects have been covered in Section II and can be brought into military section largely through references. Manpower aspect does not seem to be covered and might require several paragraphs. If there is anything further to be said, relevant to this part of the report, regarding German scientific developments being or to be exploited, it could be added. The Science Office might be consulted, if it has not been already. In general, the relevant section of SR-38 [REDACTED] should serve as a useful parallel.

25X6

3. Sections V and VI (Strategic and Future): Suggested that they be subjected to general revision. Attached is an outline furnished by Mr. [REDACTED] of G/OS which it was thought might be used as a starting point.
